Safe Boating!

*Parents, this may be the most
important one-day foundation class
you ever take with your children!*

Boating Safety Course and Safety Check up 101

This one-day class is taught by experienced instructors and accomplished Seamen.

This special offering is the Safe Boating component of our approved US Coast Guard Launch Tenders License Course. We will also credit your payment to this Boating Safety Course if you later wish to enroll in our approved US COAST GUARD Launch Drivers or OUPV License Courses.

During the Boating Safety course, the Portland Yacht Services experts will give your trailer-able boat a free safety inspection, and supply you with a final written report...

We will also offer a discount on safety equipment from our Parts room, and this course may qualify you for a discount on your boat insurance!

Also available while you take the course, Portland Yacht Services factory-trained mechanical crew will perform a spring start-up on your engine for only \$59 dollars plus parts. This offer is applicable to owners of Evinrude, Johnson, Suzuki, Yamaha and Mercury. (Appointments only, ask for details)

At **Marine Learning Center** we would like your boating experience to be the best possible. We know avoiding bad experiences starts with access to organized basic boating information, safety information, and safe and reliable equipment.

This course is specifically offered to families. We encourage parents with children that are mature enough to operate a water craft, to take this Boating Safety Course as a group.
